Kanematsu Chemicals Corporation

Chemical specialist making a leap forward in the global market

FINE CHEMICALS Department **LIFE SCIENCE Department**

Pharmaceuticals, Agrochemicals and Cosmetic group : API's and Finished dosages (Antidiabetics, Antibiotics, Anticancer, Antitubercular, etc.), Intermediates for pharmaceuticals and agrochemicals, Raw materials and additives for pharmaceuticals, agrochemicals and cosmetics

Healthcare group : Health food ingredients (Fish collagen, Anserine, Immune milk, α -Lipoic acid, Creatine, Galacto-oligosaccharides etc.), Dairy ingredients (Proteins, Lactoferrin, Lactose, etc.), Food additives, Regulatory support for GRAS & Novel Food status

Fine chemical group : Photopolymer plates, Chemicals for textiles (such as dyestuffs, pigment and PVA(Polyvinyl Alcohol)), Tin compounds for plating

PAPER CHEMICALS Department

Raw material process: Inorganic chemicals, including caustic soda and sodium chlorate, used in the kraft pulp cooking process or the recycled fiber production process, and functional chemicals including deinking and antifoaming agents

Papermaking process: Inorganic chemicals used in the papermaking process, including aluminum sulfate; functional organic chemicals, including sizing agents and paper strength additives; and functional chemicals, including cleaning agents, pitch controlling agents, and antifoaming agents for process equipment and operational stability

Coating process: Coating chemicals including starch, latex, and organic pigment

Sanitary paper production process: Quality conditioning agents, functional chemicals, and fragrant materials for toilet rolls and tissue paper

Effluent treatment: Organic or inorganic flocculants

TECHNO CHEMICALS Department

Electronic components: Rare earth, metallic oxides, etc.

Road/railroad construction: Water absorption agents, emulsion, special binders, etc.

Industrial materials: Adhesive and bonding agents for a variety of purposes.

Packaging materials: Plastic IC trays, plastic containers & cases, and molded plastic products for industrial use.

Environmental conservation /sanitary: Activated carbons, etc.

FUNCTIONAL CHEMICALS Department

Aromatic solvents: Toluene, xylene, Hevy aromatic solvents, hexane, and mineral spirits

Alcohol: Methanol, IPA, butanol, EG, Ethanol, etc.

Ketone and esters: MEK, MIBK, Acetone, Ethyl Acetate, Butyl acetate, etc.

FUNCTIONAL CHEMICALS Department (Osaka Branch)

TECTYL Rust Preventives: (For export machinery, For undercoating and innercoating of transportation equipments, Volatile type, MIL specs type etc)

ANDEROL Specialty Lubricants: (For sintered bearing, For food machinery, For compressor, For chain, For gear etc)

Additives for Metalworking Fluid: (Chemtura Corporation, PCAS)

Base Chemicals: (Formalin, Melamine, Urea, Diphenylmethane diisocyanate/MDI etc)

Others: (Ethanolamine, Isopropanolamine, Liquefied ammonia, Vegetable oils, Various base oils etc)

SPECIALTY CHEMICALS Department

Valvoline-branded motor oil Eagle One

BASF (Germany) coolant Glysantin

Application and sales of UFH Coat (ultraviolet curing resin coating)
